

OFFICE OF LAND QUALITY

KEY to HAZARDOUS WASTE NOTIFIER LISTS

- ✍ Any installation which handles RCRA hazardous waste must submit a notification to the state and obtain an ID number.
- ✍ Hazardous waste identification numbers are assigned to the physical location of a handler.
- ✍ The lists show the most recent information submitted to the state by the handler.
- ✍ The lists display every ID number that has ever been issued. Many of these handlers may now be out of business or no longer handle hazardous waste.
- ✍ The type column indicates what type of activity the handler conducts. If it is blank the handler no longer conducts that type of activity.
- ✍ The status column designates the reason a handler is no longer active.
- ✍ For more information about Used Oil or Universal Waste go to the IDEM website at www.in.gov/idem/land ; Publications, Guidance Documents.

If you have any questions you may contact Marilyn Hansen at 317-232-7956 or mjhansen@dem.state.in.us

Generator type codes

- 1 = Large Quantity Generator
- 2 = Small Quantity Generator
- 3 = Conditionally Exempt Small Quantity Generator

Generator status codes

- A = active handler
- D = mail returned
- O = other status
- 4 = one time generation
- 6 = non-handler; still in business
- 7 = out of business
- 8 = never generated HW
- 10 = regulated under another ID number

Transporter type codes

- S = Handler transports their own hazardous waste
- C = Handler transports hazardous waste commercially
- X = Handler transports hazardous waste, but the commercial status is unknown

Transporter status codes

- A=active
- D= mail returned
- 6=no longer a transporter; still in business
- 7=out of business

Treatment, Storage, Disposal Facility type codes

P = the handler is a precious metals handler only

X = the facility has interim status or a permit to treat, store, or dispose of hazardous waste.

? This includes TSD's who are inactive (i.e. no longer accepting waste), but have not yet completed a RCRA closure

? This list includes facilities who accept waste only from related or contractual partners, i.e. they are not commercial facilities.

Treatment, Storage, Disposal Facility status codes

A = Actively handling waste

D = mail returned

I = No longer handles waste; but has not finished RCRA closure

S = referred for state or federal remedial action

5 = formerly a TSD; has finished RCRA closure

Used Oil Activities

Each of the various types of used oil activities that a handler may engage in are listed. A "Y" indicates that the facility conducts the indicated activity. An "N" indicates that it does not. The categories are:

Processor	Recycler
Re-refiner	Burner
Transporter	Collection Center
Transfer facility	

Spec oil marketer: The marketer who first claims the used oil meets the specifications

Off-spec marketer: The marketer who directs shipment of off-specification used oil to a used oil burner.

Universal Waste Activities

Large Handler: L = facility is a Large Handler, i.e. accumulates over 11,000 pounds

Destination Facility: Y = facility is a destination facility.
